

**SHELF SUPPORTS (WORK-SURFACE MOUNTED)**

Shelf Supports are available in many heights, with or without Electrical Power (EP). These rigid supports are constructed of a heavy-gauge steel assembly, with easily removable side panels that provide easy access to wiring. Finished in the same manner as the Base Cabinets.

**SS-12** (12" H x 4" W x 8" D)

**SS-16** (16" H x 4" W x 8" D)

**SS-18** (18" H x 4" W x 8" D)

**SS-21** (21" H x 4" W x 8" D)

**SS-24** (24" H x 4" W x 8" D)

**SS-12-EP** (12" H x 4" W x 8" D)

**SS-16-EP** (16" H x 4" W x 8" D)

**SS-18-EP** (18" H x 4" W x 8" D)

**SS-21-EP** (21" H x 4" W x 8" D)

**SS-24-EP** (24" H x 4" W x 8" D)

**Power Cord Routing:**

EP kits come with a 9' Power Cord which can be routed through knockouts on the sides and rear of the shelf support. Holes in the bottom and top can also be used to route cords, though drilling through work-surfaces is required.

Holes and knockouts are standard size and allow easy connection to electrical conduit fittings.
